

VETRI-SCIENCE® LABORATORIES

GLYCO-FLEX® Life Stages Joint Health Program

- **GLYCO-FLEX® I Canine** represents Stage I of our comprehensive stage of life program for joint support. Glyco-Flex I Canine is recommended by veterinarians for puppies and dogs with an early need for basic joint support. **Available in an imitation roast chicken-flavored chewable tablet or a chicken liver-flavored bite-sized chew.**
- **GLYCO-FLEX® II Canine** represents Stage II of our comprehensive stage of life program for dogs needing moderate joint support. It's also recommended for adult and maturing dogs, sporting and working breeds as well as a follow-up to orthopedic surgery. **Available in an imitation roast chicken-flavored chewable tablet or a chicken liver-flavored bite-sized chew.**
- **GLYCO-FLEX® III Canine** represents Stage III of our comprehensive stage of life program for dogs needing maximum joint support. It's also recommended by veterinarians for geriatric and working dogs as well as a follow-up to orthopedic surgery. **Available in an imitation roast chicken-flavored chewable tablet or a chicken-liver flavored bite-sized chew.**
- **GlycOmega™** is *Perna canaliculus* from an exclusive New Zealand source. Unlike *Perna* extract-based products and mussel powders, which may lack important fatty acids and other bioactive components (e.g. defatted powders or extracts), in GLYCO-FLEX® the entire organism is utilized. Only GLYCO-FLEX® products are formulated with **GlycOmega™** *Perna*.
- **Directions For Use:** After initial period, the number of tablets or soft chews per day may be reduced to maintenance level. If giving more than one tablet or soft chew, divide between AM and PM.

Tablets

Initial (4 - 6 weeks):

Up to 30 lbs: 1/2 tablet.
31 - 60 lbs: 1 tablet daily.
61 - 100 lbs: 2 tablets daily.
